Academic Information

Course Selection and Scheduling

Students must be able to demonstrate completion of all necessary pre-requisites to be enrolled in a course. This most often is evaluated based on successful completion on an academic transcript. Areas this is particularly important, but not limited to – Business, Mathematics, Statistics, Engineering, Computer Science, and all lab Sciences.

To ensure best chances of enrolment, students must have syllabi prepared with necessary prerequisites at the time they apply to study at Rutgers. Exchange students are enrolled at the end of the registration period, thus courses offered may not be open or available for registration once they are eligible.

Students should anticipate enrolling in a variety of courses during their time of study at Rutgers. A typical course load would be 2 to 3 courses in a student's major or intended area of study, with 2 to 3 courses that support a student's general studies or serve as degree requirements.

Students should NOT plan to take 4+ courses in their major, primary field of study, or single discipline. No course listed in the Schedule of Classes is guaranteed to be offered each semester, nor do we guarantee space/availability at the time of exchange student enrolment.

Course listings for exchange students

Students have access to a wide range of disciplines. For an active listing of courses, please see our online schedule of coursework: <https://sis.rutgers.edu/soc/> Students will be allowed to register based on completion of the necessary prerequisites.
